

ANYTIME FITNESS®

International Tanning Technologies

Performance Not Promises

International Tanning Technologies (ITTI) in Cleveland, Ohio, has manufactured the all-steel made-in-America Sunsource™ tanning beds for the Anytime Fitness clubs since 2004, and is now the factory-direct preferred vendor for beds, parts, lamps, and service. Preferred pricing on beds and lamps, lease options, and a service line direct to the manufacturer are some of the new benefits available as a result of the collaboration between ITTI and the Anytime Fitness franchise.

An all-steel powder-coated shell mounted on an all-steel powder-coated frame, Sunsource™ tanning beds are uniquely adapted to the demands of high-traffic health clubs and gyms, able to stand up to long-term stresses most other tanning beds, often 90% plastic, are not able to live up to in the long term.

Sunsource™ tanning beds and booths feature state-of-the-art electronics, redundant timers, fan delays, an innovative lamp socket support system, double the internal cooling fans of its competitors, body fans, and not one but two remote timer hookups, both low-voltage and high-voltage, and come lamped with Light Sources or Heraeus bulbs, the two most respected and high-quality bulb brands on the market today.

Sunsource™ is specifically designed to interact with the Anytime Fitness security interface.

Built to last, an extended four-year parts warranty protects against untimely problems, and factory-direct shipping minimizes down-time.

Service and technical assistance are now available at the source, and ITTI partners with its vendors, such as ADI, manufacturers of the T-Max timing systems, to provide same-day help whenever needed.

ITTI stocks lamps and parts for most other tanning beds and booths, as well, featuring one-stop shopping and preferred pricing for all Anytime Fitness franchises.

XP3200100w

XP3200

The Workhorse of the Industry. Made in the U.S.A. by Americans.

10, 15, & 20 Minute Tanning

Warranty⁴

International Tanning Technologies offers a four year limited warranty from date of purchase on all Sunsource® tanning equipment. In addition to the four year replacement on parts excluding lamps, pistons, and acrylics, International Tanning Technologies extends a full ninety day warranty on all labor that may be required. Any modification made to the equipment will void the warranty.
